NEO AYURVEDA
Be Healthy Again

What food should be taken and act like an Elixir for Bones & Joints?

What foods should be taken by bones & joints patients

- i) Pre-Biotics: once -2 to 3 grains (pieces) of raw garlic, ½ cm sliced raw ginger and ½ tea spoon (2.5 gram) soaked fenugreek seeds once in morning empty stomach.
- ii) Banana Stem Juice: Two times a day, once in the morning and once in the evening. Helps in removing calcareous formations in the arteries and capillaries. This must be consumed twice a day (if possible), 50-60 ml each time.
- iii) Flax Drink: Two times morning and evening Neo Ayurveda defined flax diet - 70-80 grams per serving should be consumed. It contains omega 3 and omega 6 essential fatty acids (this helps in regulating the cellular metabolic activity and the cellular respiratory system) and high amounts of lignans (this helps in detoxifying the cells). One portion of flax diet has the nutritional equivalent of 100 KG of peanuts in respect of . Flax diet should be taken twice a day without mixing water. As a 1st course of break fast and evening as a snacks
- iv) Vegetable: Leached Raw Leafy vegetables juice -(Neo Ayurveda defined recipe) Twice a day , afternoon before lunch and night before dinner it acts as a natural supplement for maintaining cholesterol levels in the body and helps in thinning blood and normalizing uric acid , urea in the blood, it also adds a rich nutritional value to the diet,
- v) Leafy vegetable: Consumption of more than 60% of leafy vegetables and vegetables with 5% of pulses Preferable green gram or chickpeas as it contains easily digestible protein with tomato, potato green chilies, zinger, garlic , coriander leaves with different spices as in normal preparations with ½ tea spoon tempering (tadaka/vaggarane) . Only after boiling , the water released from the preparation's should not be given to the patient. (Neo Ayurveda defined recipe)
- vi) Cereals: Only rice , jowar and wheat should be consumed as it contains low levels of potassium. (No more than 25-30% of cereals should be consumed in each meal as cereals contain 13-14% indigestible protein which will increase the creatinine level in the body).

What food should
be taken
